1) Read the text about England and decide if the following sentences are true or false.

England is the biggest of the four countries in the United Kingdom. Together with Scotland and Wales, these three countries are the island of Great Britain. The English Channel is in the south between England and France. People travel to France by ferry across the English Channel or by train through the Channel Tunnel which goes under the sea.

Over 50 million people live in England and that's around 80 per cent of the total UK population. It is a multicultural country where more than 250 languages are spoken in the capital city, London. The United Kingdom is a constitutional monarchy, which means that there is a queen or king but they don't make the laws of the country. Laws and political decisions in England are made by the Parliament of the United Kingdom.

Other large cities in England are Birmingham, Manchester, Liverpool, Leeds and Bristol. Outside cities, England is a very green country and has many rural areas of natural beauty such as the Lake District, an area with lots of lakes in the north, and the New Forest, a big area of forest in the south of the country.
